

OUR TECHNOLOGY AND PRACTICES

ITVec is an international IT service company working in Lumpsum project or time and means as outsourcing partner for big and complex organizations worldwide.

Our team of experts works on a large range of IT technology. It is including soft developers, IT/business analysts and security implementation.

ITVec values its clients and thus works in a flexible and international environment for software development process which can be easily adjusted as per clients' requirements. Agile/Scrum method is currently implemented.

OUR TEAM

People are the most important asset of any service oriented organization and so does it count a great deal in an IT company. This is doubly true for a company providing custom software development outsourcing services. Our Consultant team consists of IT international professionals/developers (European, Russian, Asian...) who have a significant experience of technology designing (architect), soft developing and managing projects at the client offices.

Our success is based on the skills and commitments of our IT staff.

OUR MISSION AND ADDED VALUE

Achieving our goal by providing distinguished software services in the global markets by constant Innovation in Technology, Illuminating the surroundings by sharing our knowledge and adopting an Integral approach towards work thus creating a congenial and a nurturing environment that will enable us to increase our revenues consequently increasing the assets for all our stakeholders.

Selecting the global software outsourcing partners for custom software development is a critical decision because of its impacts on the overall business.

ITVec understands this criticality and expertise in solving complex business challenges using thought process and information technology.

Our international experience and expertise in many technologies and fields as well as standard processes makes ITVec the right outsourcing partner.

Some of the compelling reasons why to work with ITVec as your global software outsourcing partner:

- CMMI Level 3 Software Development Company
- Microsoft Gold Certified Experts
- Significant IT Outsourcing Services Experience
- IT/ Cyber security
- Approach to build a long term relationship
- Agile /scrum method deployment

We have successfully completed 100+ projects in multiple industries like BFI, Energy & Utilities, Media & Entertainment, Construction & Infrastructure
